

A Spell for Prosperity

When we cast a spell we do so for the good of ourselves and others.

We must not hex or work a spell in a way that could affect the free choice of others.

We call on all forces of nature to help to resolve our situation. We believe and trust that any spell we cast must be done positively without any form of negative energies or feelings.

Ingredients

½ pint of water (preferably rain water)

1 teaspoon of vinegar

1 sheet of white paper

1 red pen

1 silver coin

1 saucepan

Method

Pour water into saucepan

Add vinegar

Add silver coin

Bring to the boil and simmer.

Write the amount of money you need, ***not want***, on paper using the red pen

Drain water. As you watch the water draining, visualise money coming your way.

Place silver coin in the sheet of paper. Fold it neatly as if you are folding notes of money.

Bury wrapped money under a tree or shrub

As the shrub or tree blossoms and flowers, your money will grow

Best time of year to cast spell is spring. Best day is Saturday
